

## News letter breeding season 2017

Following the temporary cancellation of the NRHA Germany from the EFRHA Nomination Program (ENP), the stallions inscription for the 2017 breeding season should always be made to EFRHA, but will enjoy the same conditions and rights of the BIP IRHBA, that means:

The enrolled stallions on the program will make all their foals eligible only for the **Futurity IRHA 2021**. For the foals of stallions not enrolled it is still possible to enter them by December 31 of the birth's year.

We hope that the new EFRHA program can be started from the breeding season 2018 and for sure will continue to maintain the characteristics of the breeding season 2017 giving the opportunity to enroll **only the stallions** or the foals individually. Until the new program will not become fully operational the registration of foals on the NRHA European nomination program will remain separate. It 'so obvious that it will not be necessary, as per regulation, to enroll the foals to both programs (not including foals of stallions not enrolled in the EFRHA program): Foals enrolled in the NRHA Nomination Program will be eligible for the Futurity and European Derby , the foals of stallions enrolled in the EFRHA will be eligible for the IRHA Futurity.

For the breeding season 2014-2015-2016 you can still enroll yr stallion (or yr foal if the stallion is not eligible in the IRHBA program) from the IRHBA website untill december 31st 2016

The EFRHA council is working on The project of the new ENP with the aim of:

- Affiliate all Reining European associations.
- Creating a single breeding program open to all, in order to finance the Special Events National Affiliate Associations, the European Futurity 4 y.o. and the European Derby.

We apologize for this unexpected chagement and we intend to present shortly a new, more immersive ENP Program for the Reining European association that wil have more benefits for all the subscribers of this program.
